LITTLETON, COLORADO 80127

We offer a unique combination of qualifications based on substantial experience as REGULATORS and CONSULTANTS to help clients comply with environmental regulations. This integrated experience provides understanding on how to seek solutions to your issues with minimal expenditures of time and money. In some cases, we may be able to identify revenue options for LIQUID by-products.

WORK EXPERIENCE

As Regulator

Colorado Water Quality Control
Division (2002-2011)

Manager of permitting programs for domestic and industrial discharges and associated technical staff. Responsibilities included review of all discharge permits issued to oil and gas operations.

Additional assignments included working with senior technical staff of Colorado Oil and Gas Conservation Commission on scoping technical issues for quarterly meetings of WQCD/COGCC Directors and assistance in COGCC rule-making.

Regional Environmental Protection Agency
(Yanbu, Saudi Arabia)

Manager of agency serving new industrial city, deepwater port, oil terminal (million barrels), low and high sulfur oil refineries, solid and hazardous waste landfills, and natural gas plant.

As Consultant

Development of proposed projects for the reuse and beneficial uses of produced water in Colorado.

Remediation of soils and groundwater contaminated with petroleum products.

Removal of leaking underground gasoline tanks (UST)

Manager of EIS process for proposed petrochemical plant (California) and refinery expansions (Texas)

Siting of petrochemical plants in gulf coastal region.

Lead workshops for training senior technical staff from Venezuelan refineries on environmental decision-making.

REGULATORY DOCUMENTS FOR WQCD

Water Quality Policy -24
Implementation of Narrative Standards in Discharge
Permits for Protection of Irrigated Crops (May 2008)

General Permit (COG-840000)
Discharges Associated with Produced-Water
Treatment Facilities. (September 2009)
